

Finding Linux Documentation

Lab 1: Finding Info Documentation

From the command line, bring up the info page for the `grep` command. Bring up the usage section.

Lab 2: Finding man pages

From the command line, bring up the man page for the `man` command. Scroll down to the EXAMPLES section.

Lab 3: Finding man pages by Topic

What man pages are available that document file compression?

Lab 4: Finding man pages by Section

From the command line, bring up the man page for the `printf` library function. Which manual page section are library functions found?

Lab 5: Command-Line Help

List the available options for the `mkdir` command. How can you do this? There is more than just one way.
