

System Configuration from the Graphical Interface

Lab 1: Screen Resolution

Ascertain the current screen resolution for your desktop.

Lab 2: Networking

Get the current networking configuration for your desktop. Are you on a wired or a wireless connection? What wireless networks are available, if any?

Lab 3: Time Settings

Change the time zone of your system to London time (or New York Time if you are currently in London time). How does the displayed time change? After noting the time change, change the time zone back to your local time zone.

Lab 4: Installing and Removing Software

Install the screen package. Verify that it runs, and then remove it.
